RUST SEAL

Rust Seal is the ideal pretreatment before painting rusted metal.

CRC Rust Seal stops the corrosion process by forming a black protective barrier that seals off the rust from moisture. This way, it transforms corroded metal into an easily paintable surface without any time-consuming sandblasting. Can be directly applied on rusted metal. Paintable with any top coat (e.g. CRC Galva Color) after 2 hours of drying. Eco-friendly and safe-to-use.
